

Introduction

Auto Login Link allows a user to access the CastNET user interface without entering a user name or password. Once configured a user can simply select the link in an internet browser and access CastNET. The Auto login feature is assigned to a Role. Once a user is authorized to a role that includes the Auto Link Feature, an encrypted code is generated for that specific User Account.

Note: Auto login is a per user configuration and can be used in combination with any CastNET User Role except the Super User role.

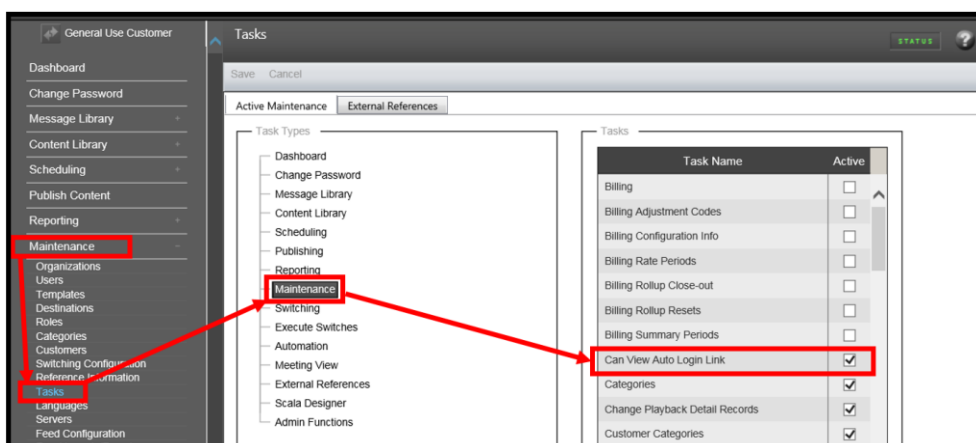

Configuring Auto login

The Auto Login feature must be turned on in Maintenance. “Can Use Auto Link” and “Can View Auto Link” must be enabled for the Auto Link feature to be added to a Role.

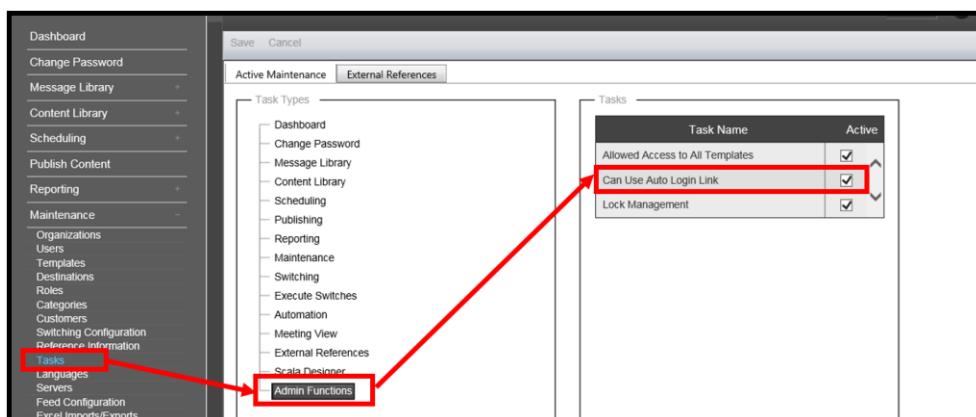

Note: Any user who is granted a super user role will automatically see all users’ Auto Login link.

To turn on Auto Login Links, follow these steps:

1. Maintenance>Tasks>Maintenance>Can View Auto link.
2. Select “Can View Auto Link”.

1. Maintenance>Tasks>Admin Login.
2. Select “Can Use Auto Link”.
3. Select “Save”.

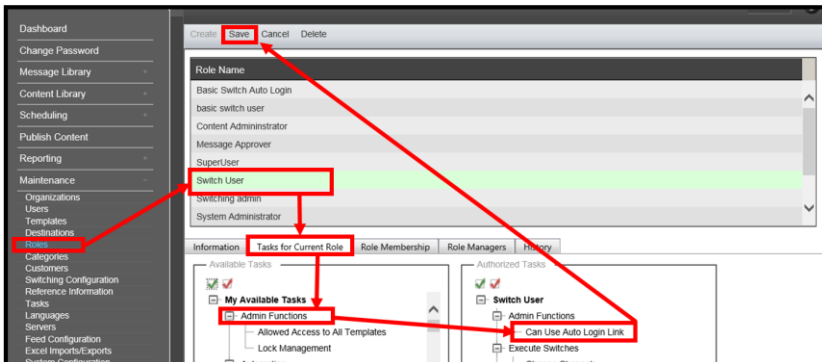

Adding Auto Login tasks to a Role

Now that the Auto Login feature has been activated, you can add the “Can use Auto Login Link” to existing or a new role.

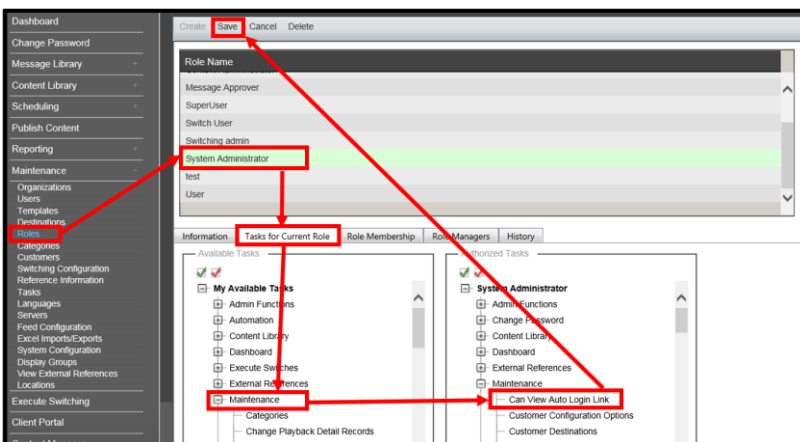

To add “Can Use Auto Login Link” to a Role, follow these steps:

1. Select **Maintenance>Roles**.
2. Create a new Role or double-click on an existing Role.
3. Select **Tasks for Current Role**
4. Under **Maintenance** drag “Can Use Auto Login Link” from “Available Tasks” to “Authorized Tasks”.
5. Select “Save”.

To add “View Auto Login Link” to a Role, follow these steps:

1. Select **Maintenance>Roles**.
2. Create a new Role or double-click on an existing Role.
3. Select **Tasks for Current Role**
4. Under **Maintenance** drag “Can View Auto Login Link” from “Available Tasks” to “Authorized Tasks”.
5. Select “Save”.

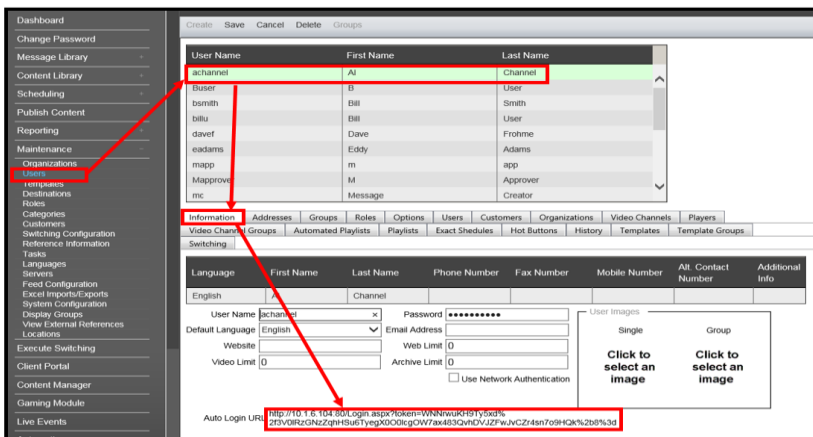

Creating an Auto Login Link Shortcut

When you create a User Account and grant the user profile access to a role that supports the Auto Login Link tasks, CastNET will create an encrypted link that can be copied to a web browser and saved as a favorite or short cut.

Copying the Auto Login Link

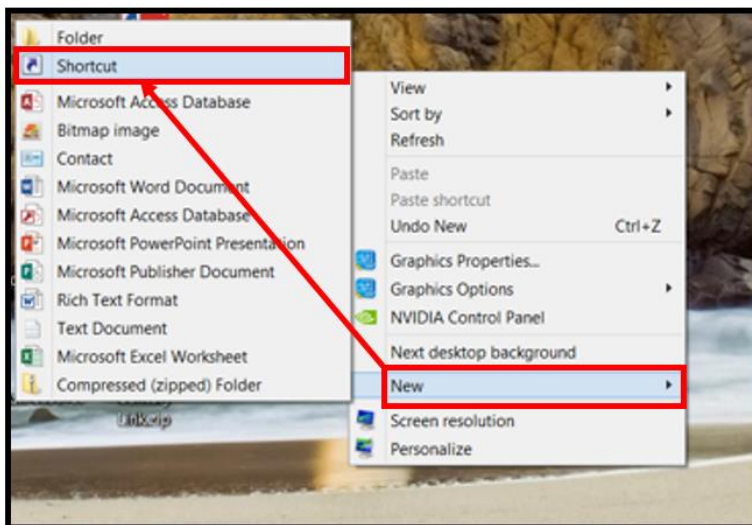

1. Go to **Maintenance > Users**.
2. Double click on a User that has the Auto Log in link assigned to their role
3. Click Information
4. At the bottom page select and copy the Auto Login URL.

Creating Shortcut on the desktop using the Auto Login Link

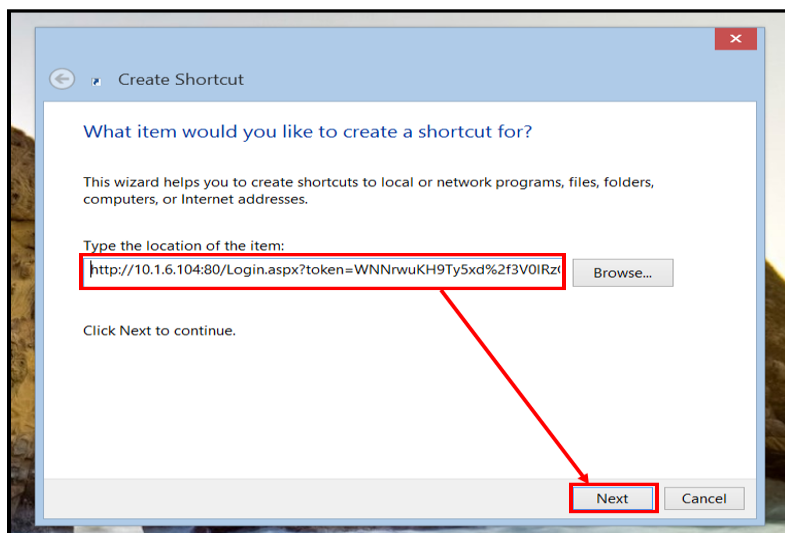

(Note: the computer must be able to reach CastNET)

1. Right click on the desktop where you want to install the shortcut
2. Select **New** then select **Shortcut**.

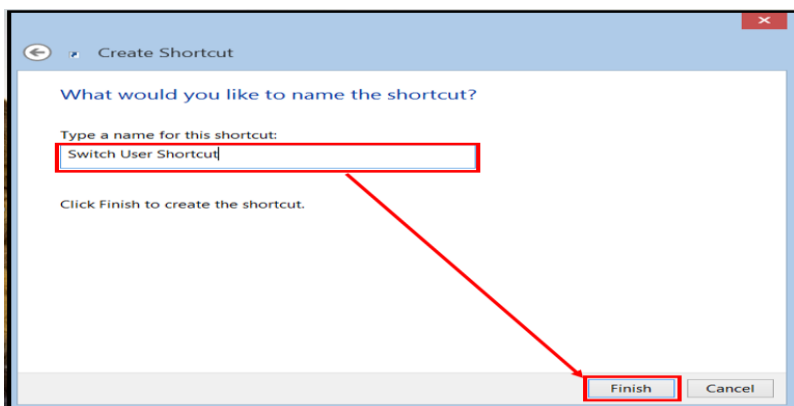

Creating Shortcut on the desktop using the Auto Login Link (continued)

3. Paste the entire Auto Login URL into location.
4. Select **Next**.

5. Enter the name of the short cut.
6. Click on **Finish**.

This will place a short cut on the desk top. Now anyone that can access this desktop will be able to access the assigned role in CastNET without entering a User Name and Password.
